Professional Summary

Full-Stack Software Engineer with 6+ years of professional experience (since 2019) building production web, mobile and backend systems in Python, JavaScript/TypeScript (React, Node.js), Java (Spring Boot), PHP and Flutter/Dart. Currently the sole engineer owning end-to-end delivery of a financial automation platform (Python REST API, Vite/React, PostgreSQL, Google Cloud Platform, Firebase) that runs daily operations for a BRL 120M+ receivables investment fund (FIDC). Experienced with relational and NoSQL databases, ORMs (Hibernate, Prisma, Drizzle), cloud deployment and scientific computing (C++, Python, PySide). Former Java instructor.

Technical Skills

- **Languages:** Python, JavaScript, TypeScript, Java, PHP, Dart, C++, SQL, HTML, CSS
- **Frontend & Mobile:** React, Vite, Flutter, Responsive Web Design, REST API integration
- **Backend & APIs:** Python (FastAPI / Flask), Node.js, Java Spring Boot, Java Web (Servlets/JSP), PHP, RESTful API design, authentication & authorization
- **Databases & ORMs:** PostgreSQL, MySQL, NoSQL (Firebase Firestore), Hibernate/JPA, Prisma, Drizzle ORM, data modeling, query optimization
- **Cloud & DevOps:** Google Cloud Platform (GCP), Firebase, Docker, Git, GitHub, CI/CD, Linux
- **Data & Scientific Computing:** Python data analysis (pandas, NumPy), process automation, numerical simulation, computational fluid dynamics (C++), desktop GUIs with PySide (Qt)
- **Practices:** Object-Oriented Programming, Agile/Scrum, end-to-end product ownership, client communication, technical teaching & mentoring

Professional Experience

Software Engineer (Part-Time, Sole Developer) — [Lysa Tech](#) & [Ketos](#) · Remote · Jun 2026 – Present

- Architected and built, as the sole engineer, a full-stack platform that automates the daily management workflow of a BRL 120M+ credit receivables fund (FIDC).
- Developed a Python REST API and a Vite/React frontend backed by PostgreSQL, deployed on Google Cloud Platform with Firebase for authentication and hosting.
- Replaced manual, spreadsheet-based daily routines with automated data pipelines, validations and reports, reducing operational risk for fund administrators.
- Own the full lifecycle directly with the client: requirements gathering, system design, database modeling, deployment, monitoring and support.

Java Instructor — [Entra21 Program](#) · Itajaí, SC, Brazil · Apr 2026 – Sep 2026

- Taught 15–20 students in a technology bootcamp covering Java fundamentals, Object-Oriented Programming, Java Web and Spring Boot.
- Designed hands-on exercises and projects on REST APIs, persistence with Hibernate/JPA and relational databases.
- Mentored students on code quality, debugging and software design practices.

Full-Stack Developer — [Didbox](#) · Brazil · dec 2024 – jul 2026

- Designed and built a website creation platform from scratch, taking the product from initial concept through production.
- Developed a visual website editor that allows users to create and customize responsive websites without coding.
- Built the platform's frontend and backend, including website management, customization, and publishing workflows.
- Owned the full development lifecycle, from requirements and architecture to deployment and maintenance.

Full-Stack Developer (PHP) — [DietSystem](#) · Brazil · Nov 2021 – Jan 2023

- Developed and maintained features for a nutrition management web platform using PHP, JavaScript and MySQL.
- Built backend endpoints, database queries and frontend interfaces across the full stack.
- Fixed production bugs and improved performance and usability of existing modules.

Freelance Web Developer — Self-Employed · Remote · 2020 – Present

- Delivered websites and web applications for multiple clients, including [polyperfil.net](#) and [terapizi.com.br](#)
- Handled the full delivery cycle: requirements, UI implementation, responsive design, deployment and maintenance.

Flutter Mobile Developer — HomeQR · Brazil · Oct 2019 – Oct 2021

- Built cross-platform mobile applications for Android and iOS with Flutter/Dart.
- Integrated apps with REST APIs and Firebase services (authentication, database, push notifications).

IT Intern — AGU (Advocacia-Geral da União, Brazilian Federal Attorney General's Office) · Campo Grande, MS, Brazil · Feb 2019 – Jun 2019

- Provided IT support for a federal government office: computer setup, OS installation, backups and troubleshooting.
- Supported computer network maintenance and built spreadsheets for internal data management.

Research & Scientific Software

Research Software Developer, Drilling Software (Scholarship) — UDESC · May 2026 – Present

- Develop a Python desktop application with PySide (Qt) for optimization and correction of oil well trajectories.
- Implement numerical optimization algorithms, data processing and interactive visualization for engineering users.

Research Developer, Computational Fluid Dynamics — Geoenergia Research Group · Aug 2025 – May 2026

- Developed and extended C++ code for computational fluid dynamics (CFD) simulations applied to energy and reservoir problems.
- Built Python scripts for simulation data analysis and results visualization.

Education

Exchange Student, Engineering — University of Regina · Regina, SK, Canada · Jan 2027 – May 2027

Bachelor of Engineering, Petroleum Engineering — Santa Catarina State University (UDESC) · Brazil · 2022 – 2028 (Expected)

- Relevant coursework: Numerical Methods, Computational Modeling, Programming, Statistics, Fluid Mechanics.
- Member, SPE (Society of Petroleum Engineers) UDESC Student Chapter.

Technical Diploma in Information Technology (IT Technician) — Federal Institute of Mato Grosso do Sul (IFMS) · Brazil · 2017 – 2020

Languages

Portuguese (Native) · English (Advanced)
